

Victor Oloyede

Senior Frontend Developer

Dallas, TX | +1 (469) 734-1247 | victorzemail@gmail.com | [PERSONAL PORTFOLIO](#)

Software engineer with a strong sense of ownership and eye for design. Led multiple B2B development cycles from concept to delivery. Developed user experiences that directly led to increase in customer interaction as reported by major clientele. Contributor to large-scale adverts serving multiple industries including tech, real estate, fitness, and more.

PROFESSIONAL EXPERIENCE

Omnicom Group/TPN Commerce | Senior Frontend Developer

2021-Present

- Created over 100 front end applications at the clients' request, from complete site redesigns to interactive experiences, with no limit to project scope
- Developed AI-powered mobile game that led to a 1.6x increase in the time customers spent in AT&T stores, resulting in 29% greater phone and accessory sales over the 2023 holiday period
- Generated over 150 million combined social media impressions by collaborating with stakeholders to produce ads designed to maximize viewership. Major clients include but not limited to: AT&T, ExxonMobil, Frito-Lay
- Led redesign of WordPress site that hosted hundreds of Whitepaper articles adhering to SEO best practices, leading to 40% increase in site traffic and 18% reduction in bounce rate

JACOBS Engineering | Software Analyst (Contract)

2021

- Simultaneously handled technical scope of 5-10 Managed Service Provider accounts worth over \$100K each and analyzed project layout for IT solutions
- Contributed to over 200 knowledge base articles, leading to a 66% fall in bug reports as observed in the ServiceNow tool and helping to streamline software use for non-technical C-suite executives
- Built over 40 customized applications utilizing ServiceNow Developer Platform

Tyler Technologies | Software Solutions Engineer

2020-2021

- Solved over 20 unique client cases weekly by utilizing scripting and automation
- Maintained software infrastructure for office supporting nearly 500 employees
- Reduced frequency of incoming tickets by 31% by publishing documentation for in-house applications
- Became subject matter expert on a multitude of platform-specific topics

Pyon Tech LLC | IT Software Engineer

2017-2020

- Achieved 100% client satisfaction rate by conducting technical audits, including SEO and site development
- Increased web traffic by 46% by building large-scale WordPress sites hosting over 3,000 monthly visitors
- Handled up to 10 concurrent projects including triage and task delegation
- Fostered client relationships by conducting follow-ups and managing subsequent requests
